SUMMARY

An ambitious Computer Science student with a wealth of experience and a thirst for knowledge. Quick to adapt to dynamic environments, actively immersing myself in the study of diverse programming languages and various fields in computer science. I thrive on personal projects and collaborations to sharpen my skills. Ready and eager to bring creativity, dedication, and expertise to any endeavor.

WORK EXPERIENCES

(Internship) - Mar to June 2023

PT Medlinx Asia Teknologi - Front End Developer

Collaborated on Izidok's Medical Records App front-end using Laravel Blade, Javascript, and TailwindCSS. Translating design mockups into functional interfaces through close collaboration with product and UI/UX teams, actively participating in QA testing and troubleshooting compatibility issues to ensure a smooth user experience, and implementing rigorous testing and debugging to resolve issues before deployment for a flawless final product.

(Project - Based Internship) - 2023 - 2024

Core Initiave x Rakamin Academy - Front End Developer

Successfully finished various tasks related to the activity of Front End Developer and gained proficiency in JavaScript, particularly in the Vue framework, and acquired skills in CI/CD tools like Docker, Unit Testing using Jest, and Deployment.

Qwords x Rakamin Academy - Fullstack Developer

Successfully finished various tasks related to the activity of Fullstack Developer. Honed my skills in PHP, JavaScript (including Vue.js and React.js frameworks), and SQL for effective database management. Became proficient in backend development using Laravel and CodeIgniter. Additionally, I gained valuable experience working with APIs.

Evermos x Rakamin Academy - Software Quality Assurance

Contributed to software projects with a focus on testing and quality improvement. Designed, executed, and analyzed functional tests, ensuring high-quality product delivery. Developing proficiency in QA principles, including RESTful API testing and performance analysis.

Rakamin Academy - Product Manager

Managed end-to-end product development lifecycle, conducting comprehensive user research and analysis to formulate Product Requirement Documents (PRD). Proficient in data analysis, stakeholder management, Agile methodology, problem framing, product ideation, release, and definition.

EDUCATION

2020 - Present   **Pamulang University**
Bachelor Degree of Computer Science - Current IPK : **3.80** / 4.00

SKILLS

- Testing and debugging
- Troubleshooting
- Git Version Control
- Responsive Web Design
- AJAX, JQuery
- CSS, Bootstrap, TailwindCSS
- HTML, PHP, JavaScript
- Laravel, CodeIgniter
- Database Technology (MySQL)
- Agile Scrum Development
- Testing Principles & Scenario
- QA Automation

TRAINING & EXPERIENCE

Dicoding Indonesia
- JavaScript Programming Basic Learning Class
- Web Programming Basic Learning Class
- Front-End Web Development for Beginner Learning Class

Pamulang University
Fast Course Website Development

Progate Indonesia
Bootcamp Modul Python
